

EMS AND ARMORACTIVE

Digital workplace technologies help people work smarter, improve their experience, and foster pride in being part of a 'cool' organisation.

The EMS Software™ and ArmorActive partnership combines two integral components of a digitised workplace—a single, organisation-wide scheduling software platform with a unique room-sign hardware enclosure, creating an innovative, turn-key conference room solution.

EMS SOFTWARE: ONE PLATFORM. VAST CAPABILITIES.

EMS is the industry's leading scheduling platform—connecting people to spaces, resources, services, and technology. Offering the greatest depth and breadth of functionality in the industry, EMS is built to support the entire spectrum of organisational needs, from meeting reservations and workspace hoteling, to resource, event, and services management.

A highly configurable solution, EMS can be aligned to fit your resources and workflows. The EMS platform also serves as a single system of record and integrates with nearly every digital hardware vendor through APIs, modules, and toolkits.

ARMORACTIVE: BUSINESS SOLUTIONS FOR MOBILITY

ArmorActive delivers unique enclosures for digital conference room scheduling. With ArmorActive, you get:

Tablet mobility deployment expertise—proven experience and knowledge to develop cost effective and robust solutions for multiple use cases within key vertical markets.

Market ready bundled solutions—solving the unforeseen challenges with tablet mobility deployments.

Strong partnerships with solution focused software and hardware companies—our goal is to support best-in-class technologies enabling the right solution.

THE PERFECT COMBINATION

The EMS Room Sign App and the ArmorActive Optica Pro LED Enclosure™

A part of the EMS Software platform, the Room Sign App, is a simple yet powerful tool. The app displays real-time meeting information and room availability on touchscreen room signs mounted outside reservable workspaces, allowing users to:

Make on-the-go bookings and reservation edits.

Work more efficiently, enabling increased productivity.

Gather important utilisation data to inform real estate and workplace decisions.

Apple, Android, and Windows compatible, the EMS Room Sign App is easy to install and use. When devices are secured in the ArmorActive Optica Pro LED Enclosure™, users are able to see a room's status easily from a distance via the glowing rim LED indicator around the enclosure. Together, the Room Sign App and the Optica Pro LED Enclosure digitises your spaces, helping to increase productivity and differentiate your brand.
